PLEASE NOTE:

1) In order to use the distance parameter (within a certain range of miles), you **MUST** enter a zip code.

2) If a 100-mile radius search returns an error, use a 50-mile radius to get accurate results.

```
;(function( $ ) { "use strict"
    var has_submitted = false;    jQuery( 'form#mod_SearchFormPage > .mc-button' ).on(
'click', function(){        if( has_submitted ){            return false;        }        var $btn =
jQuery( this );        $btn.prop( 'disabled', true );        jQuery(
